

Designation: Senior Mobile App Developer

Job Reference ID: WTPUNSMAD

Position(s): 1

Experience: 3-6 years

Location: Pune

Contact: careers@wishtreetech.com

Job Description:

- Must possess strong analytical skills to be able to break down complex problems into smaller atomic units of work.
- Requirement gathering, understanding, user stories creation and implementation.
- Participate in Scrum meetings hosted by the Client and work with various stakeholders.
- Developing new features and user interfaces from wireframe models.
- Designing applications for optimal performance and user experience.
- Need to be able to diagnose, analyze and fix defects.
- Writing clean, readable, and testable code.
- Cooperating with back-end developers, designers and the rest of the team to deliver well-architected and high-quality solutions.
- Will require to produce technical documentation as per the requirements of the project.
- Remain up to date with the modern industry practices involved in designing & developing high quality software.

Requirements:

- Senior developer with a minimum of 3 years of relevant experience in Mobile App design, development, and deployment.
- Sound communication skills to expertly communicate with international customers.
- Should have demonstrable experience of having developed apps for Android and iOS.
- Extensive knowledge of mobile app development and the entire life cycle - encompassing the whole process from the first line of code to publishing in the app stores.
- Deep knowledge of Java or Kotlin (for Android), and Swift (iOS).
- Should have expertise in dealing with one or more of the popular databases e.g. SQLite, Android Room, Firebase, Realm, Core-data etc.
- Familiarity with RESTful APIs and mobile libraries for networking, specifically Retrofit, axios, Alamofire, etc.

- Familiarity with the JSON format.
- Experience with profiling and debugging mobile applications.
- Strong knowledge of architectural patterns—MVP, MVC, MVVM, and Clean Architecture—and the ability to choose the best solution for the app.
- Familiarity with Git and GitFlow.
- Familiarity with push notifications, Admob, Firebase.
- Familiarity in integration with GPS, Bluetooth, Accelerometer, Google maps, etc.
